Vermont System
Planning Committee

All grid solutions considered

October 28, 2020
9:30am – 12:30 pm

Agenda

- ▶ Subcommittee reports
 - ▶ Geographic Targeting
 - ▶ Generation Constraint
 - ▶ Coordinating
 - ▶ Forecasting
- ▶ Presentation: Behind-the-Meter Load Reconstitution
- ▶ Regional update
- ▶ Project & policy updates

Geographic Targeting Subcommittee

Shana Louiselle, VELCO

Annual geographic targeting recommendation letter

- ▶ Draft in package recommended for adoption by full VSPC
- ▶ Summary
 1. No newly identified area “screens in” using the applicable screening tools for the potential to be resolved with non-transmission alternatives.
 2. With regard to the status of current geographically targeted energy efficiency, no area is currently targeted, thus, no recommendation is needed regarding continuation or discontinuation of a current project.
 3. No new areas have been identified where geographically targeted energy efficiency has the potential, as defined by the applicable screening tools, to cost-effectively avoid or defer an infrastructure project, so no new geographical targeting of energy efficiency should be undertaken.

Generation Constraint Subcommittee

Ed McNamara, DPS

Coordinating Subcommittee

Shana Louiselle, VELCO

2021 meeting dates

- ▶ January 27, 2021 – virtual
- ▶ April 21, 2021 – virtual
- ▶ July 21, 2021 – TBD
- ▶ October 27, 2021 – TBD

Forecasting Subcommittee

Hantz Presume, VELCO

Presentation: Behind-the-Meter Load Reconstitution

Frank Etori, VELCO

Presentation to be posted separately and provided by email link

Regional update

Molly Connors, ISO-New England

Presentation to be posted separately and provided by email link

Project and Policy updates

PUC Act 62 Investigation
EVT Demand Resource Plan
EEU Regulation
